PROFILE

I'm a Full Stack Software Engineer and I love everything related into technology and like to learn and build new things. I'm trustworthy, highly motivated and a hard working person with a high sense of duty and proactive.

EDUCATION

Kibabii University — Bungoma, Kenya
Master's degree in Information Technology — *2022 – 2024*

Université Lumière de Bujumbura — Bujumbura Mairie, Burundi
Bachelor's degree in Business Information and Technology — *2013 – 2017*

Lycée du Lac Tanganyika — Bujumbura Mairie, Burundi
High School Graduation and State Diploma — *2005 – 2012*

WORK EXPERIENCE

Village Health Works — Vyanda - Bururi, Burundi
Information Technology Officer — *May 2024 – Present, Full-time*

- Design, develop, and implement internal systems using Java (Spring Boot) and Angular. Ensure the systems are secure, scalable, and maintainable.
- Regularly update and maintain the EHR and HRM systems to ensure smooth operation.
- Provide technical support and assistance to users of the EHR and HRM systems.
- Conduct training sessions to ensure users are proficient in using the systems.
- Write and optimize SQL queries to support the Monitoring & Evaluation (M&E) team.
- Communicate effectively with stakeholders to understand their needs and requirements.

Fondation Mvura — Bujumbura Mairie, Burundi
Full Stack Software Engineer — *Dec 2020 – Feb 2022, Full-time*

- Developed custom software solutions using modern technologies such as Django, C#, VueJS, Laravel, NodeJS, Git, and Docker.
- Conducted comprehensive training sessions for end users, leveraging an in-depth understanding of the software's inner workings to facilitate effective utilization.
- Provided ongoing support to end users, leveraging in-depth technical knowledge to address queries and concerns related to the software solutions.
- Provided programming training in C#, Laravel, nodeJs, VueJs and Git.

Freelancer — Bujumbura Mairie, Burundi
Software Engineer — *Jun 2017 – Dec 2020, Part-time*

- Design and development of highly functional web applications using Django, Laravel and VueJs frameworks, adhering to best development practices.
- Close collaboration with clients to understand their business needs, establish technical specifications, and ensure timely delivery.
- Performance optimization of applications to ensure maximum responsiveness and smooth usage.
- Ongoing maintenance of existing systems, bug fixing, and integration of new features in line with evolving needs.

Kreatives Technologies — Bujumbura Mairie, Burundi
Software Engineer — *Dec 2016 – May 2017, Full-time*

- Design and development of Oracle database tables to optimize the storage, retrieval, and management of critical data essential to the company's operations.
- Creation of detailed and interactive reports using Jasper Reports, enabling efficient data visualization for decision-makers and end-users.
- Ongoing maintenance and improvement of existing systems, ensuring they remain up-to-date with the latest standards and technologies.

Kreatives Technologies Bujumbura Mairie, Burundi
Software Developer *Jun 2016 – Sept 2016, Internship*

Under the guidance and support of my mentor and supervisor, I undertook a project for my final studies titled "Design and Implementation of a Web Application for the Management of Classified Ads and Internal Messaging." The project encompassed the following key responsibilities and achievements:

- Conceptualized and designed the web application, focusing on user-friendly interfaces and efficient data management.
- Developed the application using PHP, JavaScript, HTML, and CSS, ensuring functionality and responsiveness.
- Implemented features for classified ad management, including user posting, search, and categorization.
- Integrated an internal messaging system to facilitate seamless communication among users.
- Conducted thorough testing, debugging, and optimization to ensure the application's reliability and performance.

SKILLS

Programming: Java, Python, PHP, Kotlin (Android development), NodeJs, JavaScript/TypeScript, R, SQL, C#, Git, Docker

Frameworks: Django, Spring Boot, Laravel, VueJs, Angular, ASP.NET

Developer Tools: Postman, IntelliJ IDEA, Visual Studio, VS Code, Visual Paradigm

Languages: Kirundi (Native), French (Fluent), English (Fluent)

AWARDS & ACHIEVEMENTS

Fully Funded East African Community (EAC) Scholarship: Awarded the EAC Scholarship to pursue a Master's in Information Technology (IT) at Kibabii University. (Feb 2022)

CERTIFICATES

Aggregate Data Capture and Validation Fundamentals *Jan 2024*
DHIS2 Online Academy

Introduction to DHIS2 *Dec 2023*
DHIS2 Online Academy

Google Data Analytics Specialization *Apr 2023*
Coursera
